EDUCATION

Bachelor of Science
National College for Business Administration &Economics

11/2020 - 10/2024   *Multan ,Punjab,Pkiastan*

Courses
- BS Computer Science

PERSONAL PROJECTS

Fruit Identification and Weather Forecasting (09/2024 - 11/2024)
- For my **final year project** , I developed a **cross-platform mobile app** using **React Native** and **Node.js** . The app integrates **OpenWeather API** for weather updates and **Gemini API** for fruit identification via images. I built the **frontend** for iOS and Android, focusing on **UI/UX** and API integration, while the **Node.js backend** manages data processing and API requests.

AI Travel Planner
- The **AI Travel Planner** is a React Native app that uses the **Gemini API** for personalized travel recommendations. It integrates **React Native Maps** to help users search and explore places of interest, providing an intuitive and seamless experience for planning trips.

SKILLS

React-Native   Firebase   Node js

APIs Integration   Redux   React Navigation

React js   Tailwind CSS   HTML   JavaScript

CSS
